

## What You'll Need:

Two pieces of fleece (about 1-1/2 to 2 yards each)

Fabric scissors

## Directions:

- 1) Lay the two pieces of fleece wrong sides together. This will have the design side of each piece on the "outside" showing when the blanket is complete.
- 2) With the fabric on top of each other, trim off any excess ends as necessary to make them the same size.
- 3) Cut out a 4" x 4" square from each corner. (Tip: cut out a 4" x 4" piece of cardboard to use as a guide when cutting out the corners.)
- 4) Take a yardstick and lay it flat from one corner to the other and cut strips into both pieces of the fabric, about 1" wide by 4" deep. Repeat on all four sides of the blanket. (Alternative Tip: cut out a 1" by 4" piece of cardboard to use as a guide for cutting your strips.)
- 5) Tie the matching top and bottom slits together into double knots.
